**Strictly Confidential**  
**(For Internal and Restricted use only)**  
**Secondary School Examination, 2023**  
**MATHEMATICS PAPER CODE 30/4/1**

**General Instructions: -**

1	You are aware that evaluation is the most important process in the actual and correct assessment of the candidates. A small mistake in evaluation may lead to serious problems which may affect the future of the candidates, education system and teaching profession. To avoid mistakes, it is requested that before starting evaluation, you must read and understand the spot evaluation guidelines carefully.
2	<b>“Evaluation policy is a confidential policy as it is related to the confidentiality of the examinations conducted, Evaluation done and several other aspects. Its’ leakage to public in any manner could lead to derailment of the examination system and affect the life and future of millions of candidates. Sharing this policy/document to anyone, publishing in any magazine and printing in News Paper/Website etc may invite action under various rules of the Board and IPC.”</b>
3	Evaluation is to be done as per instructions provided in the Marking Scheme. It should not be done according to one's own interpretation or any other consideration. Marking Scheme should be strictly adhered to and religiously followed. <b>However, while evaluating, answers which are based on latest information or knowledge and/or are innovative, they may be assessed for their correctness otherwise and due marks be awarded to them.</b>
4	The Marking scheme carries only suggested value points for the answers. These are in the nature of Guidelines only and do not constitute the complete answer. The students can have their own expression and if the expression is correct, the due marks should be awarded accordingly.
5	The Head-Examiner must go through the first five answer books evaluated by each evaluator on the first day, to ensure that evaluation has been carried out as per the instructions given in the Marking Scheme. If there is any variation, the same should be zero after deliberation and discussion. The remaining answer books meant for evaluation shall be given only after ensuring that there is no significant variation in the marking of individual evaluators.
6	Evaluators will mark ( ✓ ) wherever answer is correct. For wrong answer CROSS ‘X’ be marked. Evaluators will not put right ( ✓ ) while evaluating which gives an impression that answer is correct and no marks are awarded. <b>This is most common mistake which evaluators are committing.</b>
7	If a question has parts, please award marks on the right-hand side for each part. Marks awarded for different parts of the question should then be totaled up and written in the left-hand margin and encircled. This may be followed strictly.
8	If a question does not have any parts, marks must be awarded in the left-hand margin and encircled. This may also be followed strictly.
9	<b><u>In Q1-Q20, if a candidate attempts the question more than once (without canceling the previous attempt), marks shall be awarded for the first attempt only and the other answer scored out with a note “Extra Question”.</u></b>
10	<b><u>In Q21-Q38, if a student has attempted an extra question, answer of the question deserving more marks should be retained and the other answer scored out with a note “Extra Question”.</u></b>
11	No marks to be deducted for the cumulative effect of an error. It should be penalized only once.
12	A full scale of marks _____ (example 0 to 80/70/60/50/40/30 marks as given in Question Paper) has to be used. Please do not hesitate to award full marks if the answer deserves it.

13	Every examiner has to necessarily do evaluation work for full working hours i.e., 8 hours every day and evaluate 20 answer books per day in main subjects and 25 answer books per day in other subjects (Details are given in Spot Guidelines). This is in view of the reduced syllabus and number of questions in question paper.
14	Ensure that you do not make the following common types of errors committed by the Examiner in the past:- <ul style="list-style-type: none"> <li>● Leaving answer or part thereof unassessed in an answer book.</li> <li>● Giving more marks for an answer than assigned to it.</li> <li>● Wrong totaling of marks awarded on an answer.</li> <li>● Wrong transfer of marks from the inside pages of the answer book to the title page.</li> <li>● Wrong question wise totaling on the title page.</li> <li>● Wrong totaling of marks of the two columns on the title page.</li> <li>● Wrong grand total.</li> <li>● Marks in words and figures not tallying/not same.</li> <li>● Wrong transfer of marks from the answer book to online award list.</li> <li>● Answers marked as correct, but marks not awarded. (Ensure that the right tick mark is correctly and clearly indicated. It should merely be a line. Same is with the X for incorrect answer.)</li> <li>● Half or a part of answer marked correct and the rest as wrong, but no marks awarded.</li> </ul>
15	While evaluating the answer books if the answer is found to be totally incorrect, it should be marked as cross (X) and awarded zero (0) Marks.
16	Any un assessed portion, non-carrying over of marks to the title page, or totaling error detected by the candidate shall damage the prestige of all the personnel engaged in the evaluation work as also of the Board. Hence, in order to uphold the prestige of all concerned, it is again reiterated that the instructions be followed meticulously and judiciously.
17	The Examiners should acquaint themselves with the guidelines given in the " <b>Guidelines for spot Evaluation</b> " before starting the actual evaluation.
18	Every Examiner shall also ensure that all the answers are evaluated, marks carried over to the title page, correctly totaled and written in figures and words.
19	The candidates are entitled to obtain photocopy of the Answer Book on request on payment of the prescribed processing fee. All Examiners/Additional Head Examiners/Head Examiners are once again reminded that they must ensure that evaluation is carried out strictly as per value points for each answer as given in the Marking Scheme.

The monthly expenditure on milk in 200 families of a Housing Society is given below :

Monthly Expenditure (in ₹)	1000-1500	1500-2000	2000-2500	2500-3000	3000-3500	3500-4000	4000-4500	4500-5000
Number of families	24	40	33	$x$	30	22	16	7

Find the value of  $x$  and also, find the median and mean expenditure on milk.

$$172 + x = 200 \Rightarrow x = 28$$

2 for  
correct  
table

$$l = \text{lower limit of median class} = 2500$$

$$\frac{N}{2} = \frac{200}{2} = 100$$

$$C = 97, f = 28, h = 500$$

1

18

$$\begin{aligned}
 \text{Median} &= l + \frac{\frac{N}{2} - C}{f} \times h \\
 &= 2500 + \frac{100 - 97}{28} \times 500 \\
 &= 2500 + \frac{3}{28} \times 500 = 2553.6
 \end{aligned}$$

Median Expenditure = ₹ 2553.6

$$\text{Mean} = 2750 - \frac{35 \times 500}{200} = 2750 - 87.5 = 2662.5$$

Mean Expenditure = ₹ 2662.5

### SECTION E

**This section comprises of 3 case-study based questions of 4 marks each.**

**36.**

Two schools 'P' and 'Q' decided to award prizes to their students for two games of Hockey ₹  $x$  per student and Cricket ₹  $y$  per student. School 'P' decided to award a total of ₹ 9,500 for the two games to 5 and 4 students respectively; while school 'Q' decided to award ₹ 7,370 for the two games to 4 and 3 students respectively.

Based on the above information, answer the following questions :

- Represent the following information algebraically (in terms of  $x$  and  $y$ ).
- (a) What is the prize amount for hockey ?

**OR**

- (b) Prize amount on which game is more and by how much ?
- What will be the total prize amount if there are 2 students each from two games ?

**Sol.**

- $5x + 4y = 9500$  \_\_\_\_\_ (1)
- $4x + 3y = 7370$  \_\_\_\_\_ (2)

**$\frac{1}{2}$   
 $\frac{1}{2}$**

	(ii) (a) Solving (1) and (2), $x = 980$ $\therefore$ Prize Amount for Hockey = ₹ 980 <b>OR</b> (ii) (b) On solving $x = 980$ , $y = 1,150$ $\therefore$ Prize Amount for Cricket is more by ₹ $(1,150 - 980) = ₹ 170$ (iii) $2(x + y) = 2(980 + 1150) = 2(2130) = ₹ 4,260$	2 1 1 1

37. Jagdish has a field which is in the shape of a right angled triangle AQC. He wants to leave a space in the form of a square PQRS inside the field for growing wheat and the remaining for growing vegetables (as shown in the figure). In the field, there is a pole marked as O.

Based on the above information, answer the following questions :

(i) Taking O as origin, coordinates of P are  $(-200, 0)$  and of Q are  $(200, 0)$ . PQRS being a square, what are the coordinates of R and S ?

	<p>(ii) (a) What is the area of square PQRS ?</p> <p style="text-align: center;"><b>OR</b></p> <p>(b) What is the length of diagonal PR in square PQRS ?</p> <p>(iii) If S divides CA in the ratio K:1, what is the value of K, where point A is (200, 800) ?</p>	
<b>Sol.</b>	<p>(i) R(200, 400), S(-200, 400) <span style="float: right;"><math>\frac{1}{2} + \frac{1}{2}</math></span></p> <p>(ii) (a) side PQ = (200+200) m = 400 m <span style="float: right;">1</span></p> <p>Area of square PQRS = <math>400 \times 400</math></p> <p style="text-align: right;">= 160000 sq. units <span style="float: right;">1</span></p> <p style="text-align: center;"><b>OR</b></p> <p>(ii) (b) Diagonal PR = <math>\sqrt{(400)^2 + (400)^2}</math> <span style="float: right;">1</span></p> <p style="text-align: center;">= <math>\sqrt{3200}</math> or <math>400\sqrt{2}</math> <span style="float: right;">1</span></p> <p>(iii) C(-600,0); A(200,800); S(-200,400)</p> <p>S divides CA in the ratio k: 1</p> $-200 = \frac{k(200)+1(-600)}{k+1}$ $\Rightarrow k = 1$ <span style="float: right;">1</span>

Governing council of a local public development authority of Dehradun decided to build an adventurous playground on the top of a hill, which will have adequate space for parking.

After survey, it was decided to build rectangular playground, with a semi-circular area allotted for parking at one end of the playground. The length and breadth of the rectangular playground are 14 units and 7 units, respectively. There are two quadrants of radius 2 units on one side for special seats.

Based on the above information, answer the following questions :

- What is the total perimeter of the parking area ?
- (a) What is the total area of parking and the two quadrants ?

**OR**

- What is the ratio of area of playground to the area of parking area ?
- Find the cost of fencing the playground and parking area at the rate of ₹ 2 per unit.

**Sol.**

(i) Total perimeter =  $\pi r + 2r$

$$= \frac{22}{7} \times \frac{7}{2} + 7 = 18 \text{ units}$$

1

(ii) (a) Area of parking =  $\frac{1}{2} \pi r^2 = \frac{1}{2} \times \frac{22}{7} \times \frac{7}{2} \times \frac{7}{2} = \frac{77}{4}$

1

Area of quadrants =  $2 \cdot \frac{22}{7} \times 2 \times 2 \times \frac{1}{4} = \frac{44}{7}$

$\frac{1}{2}$

Total Area =  $\frac{77}{4} + \frac{44}{7} = \frac{715}{28}$  or 25.54 sq. units

$\frac{1}{2}$

22

**OR**

$$(ii) (b) \frac{\text{Area of playground}}{\text{Area of parking}} = \frac{98}{77/4} = \frac{56}{11} = 56 : 11$$

**1+1**

$$\begin{aligned} \text{(iii) Required Perimeter} &= 2(l + b) + \frac{2\pi r}{2} \\ &= 2(14 + 7) + \frac{22}{7} \times \frac{7}{2} = 53 \text{ units} \end{aligned}$$

**$\frac{1}{2}$**

$$\text{Cost of fencing} = 53 \times 2 = ₹ 106$$

**$\frac{1}{2}$**
